

MobileAction for Infor M3

Mobility across your warehouse

Built to integrate with and extend Infor M3, MobileAction streamlines your warehouse operations.

Your warehouse mobility solution needs to bridge the gap between your ERP and your shop floor, giving you the ability to streamline, automate and gain real-time visibility into accurate inventory data.

ComActivity

Built for Infor M3 Warehouse and Production sites

Functionally rich core that can be matched to your business processes

MobileAction comes with rich industry-specific functionality built in to its core from day one. It is built from the ground up to seamlessly integrate and augment Infor M3 and support all your warehouse and production processes:

- Inbound
- Outbound
- In-house
- Manufacturing
- Proof of Delivery
- Replenishment planning

On top of that the solution can be extended and configured to match your business needs 100%

Streamlined app experience

MobileAction gives you an authentic mobile app experience – no matter what device. Built with Microsoft's powerful cross-platform development tool (Xamarin) MobileAction runs on Android and iOS.

Authentic app experience on:

- RF Device
- Mobile Phones
- Tablets

Native App architecture for speed and efficiency

WarehouseAction is built as a native app, so it means that it runs faster. This is because of the way the memory cache is stored and the greater processing power.

Achieve 100% fit for your business

MobileAction is architected to get you going fast, and create a precise match for your business. With rich industry content already built in, we can easily configure business-specific capabilities to get you up and running quickly. High-value unique extensions can be built using the development platform.

Rapid implementation pyramid
